 Significiant Non-Complier (SNC) List.

2005 PWS "Honor Roll" by Jeanine Oakland and Jessica Goldberger

The Drinking Water Program has been looking for a way to say "Thank You" to those public water systems (PWSs) that stay "Violation Free." The 2005 "Public Water System Honor Roll" is our first attempt to recognize those systems. Below is a list of the Alaska water systems that did not have any federal violations in the 2005 calendar year. The "Honor Roll" will be published annually in *Northern Flows*. The 2006 list will be published in our summer 2007 issue. This will allow enough time to ensure that all the 2006 sample results and follow-up information are in our State database (SDWIS/State), resulting in a more accurate list.

The list is generated from the compliance monitoring information in our State database and reflects the same kind of information that is included in the *Annual Alaska PWS Compliance Report (ACR)* the Drinking Water Program prepares for EPA each year. The list is compiled by looking specifically at when an MCL violation occurred or when monitoring and reporting were supposed to occur, not necessarily when the violation was generated. Based on the 2005 ACR, there are 734 PWSs listed on the Honor Roll, or 47 percent of the 1,549 PWSs that were federally regulated in Alaska during calendar year 2005.

Congratulations and thanks again to those public water systems that made the Honor Roll. Unfortunately, we don't have any "My water system is on the Honor Roll" bumper stickers at this time, so we encourage you to display this list instead! If you're not on the 2005 Honor Roll, check the next newsletter to see if you made the 2006 PWS Honor Roll.

If you would like more information on how we generated this list, please call your local Environmental Program Specialist, or Jeanine Oakland or Jessica Goldberger in the Anchorage office. Our phone numbers are on the back page of this newsletter.
