

Priority Measures Plan (PMP) Compliance Certification Form

Use **ONLY** pages 1-2

FOR USE BY:

- Community Water Systems (CWS) serving less than 1,000 persons;
- Non-Transient Non-Community Water Systems (NTNC) serving less than 1,000 persons;
- Transient Water Systems (TNC) serving 1,000 persons or more.

*****PRINT VERSION ONLY*****

For editable version of the Priority Measures Plan Certification Form using Adobe Acrobat, go to http://dec.alaska.gov/eh/dw/security/security_regs.html, under QUICK LINKS.

Division of Environmental Health Drinking Water Program

Priority Measures Plan Compliance Certification

Instructions

1. Use this form **ONLY** for the following Public Water Systems (PWS):

- Community Water Systems (CWS) serving less than 1,000 persons;
- Non-Transient Non-Community Water Systems (NTNC) serving less than 1,000 persons;
- Transient Water Systems (TNC) serving 1,000 persons or more.

CWS and NTNC serving 1,000 or more persons DO NOT USE THIS FORM. Use Vulnerability Assessment and Emergency Response Plan Certification Form.

2. Complete form (pages 1-2, **do not leave any items blank**) and submit the completed form to a DEC office by **August 20, 2013**.

3. Keep a copy of this form with your Priority Measures Plan.

Priority Measures Plan Compliance Certification

III. Priority Measures Plan (PMP) Certification Checklist

The Priority Measures Plan consists of some, but not all, of the requirements of an Emergency Response Plan; it is an abridged Emergency Response Plan. **At a minimum, the Priority Measures Plan includes the following information:**

1. A description of the duties and responsibilities of key water system personnel in emergencies

including an established chain of command which designates authority and takes into account the possible absence of any given individual.

Yes Page*: ** You are required to enter the page number on which this information is addressed in your PMP. A Sanitary Survey Inspector must be able to reference this section in your plan.*

2. An outline of communication pathways among system personnel and between system personnel and non-system personnel who might be expected to respond to an emergency, including the locations of up-to-date emergency contact lists.

Yes Page*:

3. Identification of alternate drinking water supplies ** sufficient to meet the needs of the water system's individual customers/consumers during an emergency, including:

a. A plan to provide an alternate water supply for durations ranging from days to months;

Yes Page*:

b. Procedures for obtaining, testing, treating, and distributing water from each identified alternate water supply, as needed:

Yes Page*:

c. Provide a brief description of **short-term** alternate water supply.

d. Provide a brief description of **long-term** alternate water supply.

** TNC systems may elect to shut down in the event of an emergency, and do not need to designate an alternate water supply.

4. A plan for responding to complete or partial power loss.

Yes Page*:

5. A plan for annual staff training in, and practicing of, all components of the priority measures plan.

Yes Page*:

Vulnerability Assessment/Emergency Response Plan (VA/ERP)

Compliance Certification Form

Use ONLY pages 3-5

FOR USE BY:

- **Community Water Systems (CWS) serving 1,000 persons or more;**
- **Non-Transient Non-Community Water Systems (NTNC) serving 1,000 persons or more.**

*****PRINT VERSION ONLY*****

Division of Environmental Health
Drinking Water Program

Vulnerability Assessment and Emergency Response Plan Compliance Certification

III. Security Vulnerability Assessment (VA) Certification Checklist

A VA shall include an evaluation of the vulnerability of the water system to a range of emergencies, including intentional acts and natural hazards. **At a minimum, a VA shall consider potential risks to:**

- (a) pipes and constructed conveyances;
- (b) physical barriers;
- (c) water collection, pretreatment, treatment, storage, and distribution facilities, including fire hydrants;
- (d) electronic, computer, and other automated systems;
- (e) the use, storage or handling of chemicals;
- (f) the operation and maintenance of the water system;
- (g) the resiliency and ability of the water system to ensure continuity of operations in the event of a disruption caused by an emergency.

Has a VA, as described above, been completed for your system?

- Yes** **Date Completed**
- No**

IV. Emergency Response Plan (ERP) Certification Checklist

An ERP shall describe the system's immediate response to emergencies, its plans to return to regular service as soon as possible after an emergency, and how drinking water from an alternate water supply will be made available to a system's customers/consumers during an emergency.

A) Does the ERP incorporate the findings of the VA?

- Yes** **No**

B) At a minimum, does the ERP includes the following information:

- 1. A record of system-specific information critical to safe operation of the system. (This information must be stored in a form that will remain accessible in the event of power loss.)**

- Yes** Page*: **You are required to enter the page number on which this information is addressed in your ERP. A Sanitary Survey inspector must be able to reference this section in your plan.*

- 2. A provision for loss or inoperability of equipment, including:**

a. Identification of critical system components;

- Yes** Page*:

b. An inventory of equipment needs and availability in an emergency, including:

- The location of existing emergency equipment, generators, and spill response materials;
- Identification of additional emergency equipment needs;
- Procedures for obtaining additional services and equipment, including critical spare parts.

- Yes** Page*:

IV. Emergency Response Plan (ERP) Certification Checklist, continued

3. **A description of the duties and responsibilities of key water system personnel in emergencies**, including an established chain of command which designates authority and takes into account the possible absence of any given individual.

Yes Page*:

4. **An outline of communication pathways** among system personnel and between system personnel and non-system personnel who might be expected to respond to an emergency, including the locations of up-to-date emergency contact lists.

Yes Page*:

5. **Identification of alternate drinking water supplies** sufficient to meet the needs of the water system's individual customers/consumers during an emergency, including:

a. A plan to provide an alternate water supply for durations ranging from days to months;

Yes Page*:

b. Procedures for obtaining, testing, treating, and distributing water from each identified alternate water supply, as needed:

Yes Page*:

c. Provide a brief description of **short-term** alternate water supply.

d. Provide a brief description of **long-term** alternate water supply.

6. **A plan for responding to complete or partial power loss.**

Yes Page*:

7. **Provisions for emergency sampling and testing** for the presence of chemical or microbiological contaminants in the water, including:

a. Identification and location of emergency sampling and testing supplies;

b. Procedures for testing and sampling.

Yes Page*:

8. **A plan for annual staff training** in, and practicing of, all components of the emergency response plan

Yes Page*:
