

**ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION**  
**Division of Spill Prevention and Response**  
**Prevention and Emergency Response Program**

**SITUATION REPORT**

**INCIDENT NAME:** Pile Bay Road Tanker Trailer Spill

**SITREP #:** 8

**SPILL NUMBER:** 09269915701

**LEDGER CODE:** 14274760

**TIME/DATE OF SPILL:** Alaska State Troopers notified ADEC at 7:30 PM on June 6, 2009

**TIME/DATE OF SITUATION REPORT:** 2:00 PM on June 23, 2009

**TIME/DATE OF THE NEXT REPORT:** 2:00 PM on June 26, 2009

**TYPE/AMOUNT OF PRODUCT SPILLED:** The Potential Responsible Party (PRP) reported to the Alaska State Troopers that the tank trailer contained an estimated 9,500 gallons of diesel fuel before the incident. ADEC staff on scene reviewed the loading records for the tanker trailer and the emergency off-loading and estimated the spill to be approximately 1,400 gallons.

**LOCATION:** Pile Bay Road, Lake Iliamna. Pile Bay Road is located approximately 170 miles to the southwest of Anchorage, on the northeast end of Lake Iliamna. The exact spill location is 59° 45.474'N / 153° 50.734'W.

**CAUSE OF SPILL:** Upon further investigation it was determined that the 9,500-gallon tractor trailer fuel tank was unhitched from the towing vehicle at approximately 2:00 PM on June 6, 2009. At about 7:00 PM the fuel trailer was found on the ground with the landing gear collapsed. During the collapse, the landing gear punctured the front holding tank of the trailer, creating a hairline crack along a weld and a hole about the size of a quarter in the tank.

**POTENTIAL RESPONSIBLE PARTY (PRP):** Iliamna Development Corporation (IDC), Iliamna AK

**RESPONSE ACTION:** Sampling of the excavation and at the river's edge was completed in the early morning of June 17, 2009. IDC, ADEC, Bristol Environmental, EPA and U.S. Fish & Wildlife Service representatives met on June 22<sup>nd</sup>, 2009 to review the sample analysis of the excavation. Of the seventeen soil samples taken, one sample returned above ADEC soil cleanup levels. The sample location, which exceeded soil cleanup levels, lies in a short section between the hard pack road surface and underlying bedrock.

IDC informed ADEC that they are in the process of negotiating a lease on a small piece of land from a private-property owner to stockpile and land farm the contaminated soils.

Response personnel continue to monitor the sheening at the river's edge. Absorbent pads deployed next to the shoreline continue to show higher concentrations of fuel. Absorbent sausage booms and pads are being replaced if they become water logged or saturated with fuel. Teams of two responders per shift have been assigned to monitor the boom and change out absorbent materials on a 24-hour basis.

**RESOURCES AFFECTED:** There have been no reports of affected wildlife at this time.

**FUTURE PLANS AND RECOMMENDATIONS:** IDC will submit the final waste management plan upon acquiring property to remediate the contaminated soil. ADEC will continue to provide cleanup oversight and conduct site visits on a needed basis.

**WEATHER:** Mostly cloudy with scattered showers, southwest winds 10-15 mph; temperature in the lower 40s to 50s. Forecast mostly cloudy with scattered showers through Friday.

**UNIFIED COMMAND AND PERSONNEL:**

Incident Commander:	Bill Miller, General Manager (IDC)
F.O.S.C. :	Matt Carr (EPA)
S.O.S.C. :	Gary Folley (ADEC)

**FOR ADDITIONAL INFORMATION CONTACT:** John Brown, ADEC, 269-7688  
Gay Harpole, ADEC, 269-3064

**AGENCY/STAKEHOLDER NOTIFICATION LIST**

This sitrep has been distributed via email to the Governor's office, Senator Begich's office, ADF&G, ADNRR, SECC, USEPA, USDOJ, NMFS, USFWS, and USFS in addition to the following notified by fax:
