Subject: Update #15, sulfolane contamination

Dear concerned citizen,

You're invited to an
Open House about the sulfolane groundwater issues in North Pole

on Thursday, May 6, from 6:30 – 8:30 p.m.

in the North Pole Plaza Mall.

The Technical Project Team guiding the investigation is sponsoring the meeting. You'll be able to talk to representatives of the Alaska departments of Environmental Conservation and Health and Social Services, Flint Hills, and other experts about the groundwater contamination near the Flint Hills refinery.

We wanted to provide a more relaxed setting to talk with those interested and concerned, more relaxed than a public meeting. We'll have informational materials, posters on the walls, and various people you can talk to. We hope to see you there.

On the website about sulfolane and the North Pole Refinery, we have just posted the summary of the first Technical Project Team meeting, held April 15 in Fairbanks. You can find the summary of the meeting plus a presentation on DEC's cleanup process given then at <http://www.dec.state.ak.us/spar/csp/sites/north-pole-refinery/documents.htm#tpt>

For more information email me, or call ADEC in Fairbanks at 907-451-2143. If you'd like to call me in Juneau, my number is 907-465-5206.

Sincerely,

Marti Early
