

**PRINCESS CRUISES -- Hepburn Bio Care Dosing Diagram -- for the Princess Fleet**

**Hepburn Bio Care provides :**

Fully biodegradable, biological non hazardous waste treatment products which are used by Princess Cruises to pre-treat all waste streams and to reduce the loading on the treatment plants.

The products use the existing pipes and tanks to create a giant bioreactor throughout the vessel reducing the risk of hydrogen sulphide gas being created whilst reducing the BOD TSS and COD levels naturally prior to overboard discharge.
